Business Intelligence LLC (BI) offers a complete suite of Data Integration and Reporting services implemented by our highly specialized staff. We utilize the best tools on the market, including our DataLinksTM reporting engine, an extremely lightweight, affordable and flexible desktop Enterprise Information Integration (EII) solution.

Our Business Libraries deliver the hard-to-find expertise you need, including:

Data Connectors that allow you to connect to even the most difficult to reach data sources such as Web Services and Proprietary API's. We also specialize in creating vendor specific connectors for data sources that are OLAP and ODBC compliant.

Templates built specifically to a customers individual needs. Share predefined queries, templates and dictionary meta layers in a matter of seconds.

Dashboards built with the most up to date spreadsheet technologies. By leveraging our expertise and product line, we can provide magazine quality dashboards in half the time and money of other solution providers.

Our Services Team offers:

Consulting tailored for your individual needs. Our Services Team are industry leaders in the analytics and reporting arena. They include CFO's, financial analysts and accounting managers. Whatever your need, they will offer solutions with a level of expertise and professionalism that is guaranteed to exceed expectations.

Training that is needed to be productive in reporting and analytics. With our vast experience in these areas, we are able to customize classes to specific needs of an individual or group.
